AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the present application.

Listing of Claims:

1. (Currently Amended) A cleaning sheet having a cleaning surface comprising a cleaning area for cleaning a piled surface and a low-friction area which adjoins said cleaning area,

wherein said cleaning area has a first sheet as a scraping part and second sheet as a dust-holding part;

said first sheet is an air-laid nonwoven fabric comprising at least one thermoplastic resin selected from the group consisting of a polyolefin, polyamide, polyester and a fluororesin, and the air-laid surface having a fineness of 23 to 200 dtex;

said second sheet comprises spun-laced, air-through or spunbonded nonwoven fabric;

said scraping part of the first sheet having on the surface thereof numerous fibers that edges into the pile of a piled surface and scrapes fibrous dust present in said pile, said fibers mainly comprising fibers constituting the air-laid nonwoven fabric, and said dust-holding part of the second sheet holds the scraped fibrous

<u>dust;</u>

 $\underline{\text{wherein}}$ said cleaning area having a coefficient of static friction of 0.1 to 4.0 against wool press felt (JIS L3201 R33W),

wherein said cleaning $\frac{1}{2}$ area contains $\frac{1}{2}$ air-laid nonwoven fabric, and

said low-friction area comprises a film or a nonwoven fabric, and wherein said low-friction area has a coefficient of static friction of 0.01 to 1.0 against wool press felt (JIS L3201 R33W).

2. (Canceled)

- 3. (Previously Presented) The cleaning sheet according to claim 1, wherein an area ratio of said low-friction area to said cleaning surface is 10 to 60%.
- 4. (Original) The cleaning sheet according to claim 1, wherein said low-friction area is disposed on one side of said cleaning surface across the cleaning direction of said cleaning surface.
- 5. (Original) The cleaning sheet according to claim 4, wherein said low-friction area is disposed on both sides of said cleaning surface across the cleaning direction of said cleaning surface.

6-9. (Canceled)

Appl. No. 09/974,853 Art Unit 1771 Reply to Office Action of July 22, 2004

10. (Currently Amended) The cleaning sheet according to claim $\frac{8}{7}$, wherein said dust-holding part holds fibrous dust by having the fibrous dust physically entangled therewith or by having the fibrous dust adhered thereto via a sticky substance.

11-14. (Canceled)
